

## CIO STORY Magazine lists Pacific Controls among 'The World's 25 Most Powerful IoT Tech Providers'

**Dubai, February 16, 2016,** (BUSINESS WIRE) - Pacific Control Systems, (PCS), a leading provider of Internet of Things (IoT) managed services solutions globally, has been listed as one of the 25 most powerful IoT technology providers in the world by the US-based prestigious CIO STORY magazine. This was revealed in the publication's IoT Technology Special 2015 edition.

PCS has made it to CIO STORY's list by standing out in the current fragmented IoT landscape and demonstrating the ability to render complete end-to-end managed solutions. This listing recognizes their efforts in creating a positive impact in the IoT market place.

Dilip Rahulan, Executive Chairman of PCS, said, "We are honoured to be recognized by the CIO STORY magazine as one of the world's 25 most powerful IoT solutions providers. We have been in the forefront of providing end-to-end solutions for delivery of IoT services. This is the time for us to cater to more valued customers and prospective associates on a larger scale by delivering quality and excellence in our products and services."

Brian Kreiner, Editor-in-Chief of CIO STORY, said: "We are happy to recognize Pacific Control Systems for their outstanding contribution to the growth of IoT

technology in the world. Pacific Controls manages to stay committed to their clients by being an end-to-end provider taking care of customer pain points and providing the appropriate solution, while helping customers focus on their core business. Unlike other competitors in the business, they continuously help enhance business processes, instead of being just a 'point-in-time' solution provider."

"Continuous R&D activities and innovations in IoT solutions have helped Pacific Controls demonstrate expertise in customer industries, no matter what type they may be of. PCS facilitates their customers reap full benefits of the IoT by enabling connectivity of machines across many dimensions, carrying out intensive business analytics and facilitating fully managed end-to-end services," he added.

PCS, a world leader in Managed Services, is a pioneer in the convergence of networked computing and large scale data management with real time machine intelligence and is driving the integration of physical and virtual worlds. PCS now offers enterprise-grade cloud security even to its smallest customers, so anyone operating within its cloud is given end-to-end protection, allaying worries about cloud adoption.
